## EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

### *Allowable Subject Matter*

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The applicant's invention is geared toward transmitting from a mobile radio communications network to a mobile station a signaling message containing compressed mode parameters with measurement control parameters for the radio measurements to be performed by said mobile station. The examiner finds the terms "compressed mode parameters" and "measurement control parameters" to be terms of art, the definitions of which are clear from the applicant's specification, applicant's arguments filed 8/9/04 and 7/7/05, and the 3G TS25.331 v3.2.0 document cited in the specification. The examiner has only discovered prior art (such as MULLER US6845338B1 and WILLARS US6597679B1) consistent with that which the applicant admits as prior art, namely compressed mode parameters and measurement control parameters being transmitted in separate signaling messages. While prior art (such as SUBBIAH US 6725038B1) does exist teaching the combination of different types of parameters in a single signaling message, there is no motivation to specifically combine compressed mode parameters and measurement control parameters in a single signaling message transmitted from a mobile radio communications network to a mobile station. Therefore, the applicant's invention, when considering the entirety of the

subject matter, comprise a unique combination of subject matter that is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. WILLARS (US 6,597,679 B1) and SUBBIAH (US 6,725,038 B1)

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond B. Persino whose telephone number is (571) 272-7856. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 5:30 PM.
